EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Elizabeth C. Richter on 11/18/2009.

3. The application has been amended as follows:

Claim 9 has been amended to now read:

9. A hermetically encapsulated refrigerant compressor, comprising:

a hermetically sealed compressor housing;

a piston-cylinder unit disposed in an interior of the housing, said piston-cylinder unit compressing a refrigerant and comprising a suction valve with an intake port arranged in a valve plate of the suction valve;

a suction muffler through which the refrigerant flows to the suction valve of the piston-cylinder unit, said suction muffler being disposed on the cylinder head of the piston-cylinder unit and comprising:

a filling volume;

an inlet cross section through which refrigerant flows into the suction muffler; and

a compensating volume in connection with the suction muffler and the interior of the compressor housing and in which the refrigerant oscillates,

Art Unit: 3746

wherein the inlet cross section is simultaneously a connecting port between the compensating volume and the filling volume, and the compensating volume is formed by an outer tube which tightly encloses the intake port ~~or~~ and the inlet cross section and encloses a refrigerant suction pipe at least along a section, ~~said outer tube being directed into the compressor housing,~~ wherein the suction pipe extends from the exterior of the compressor housing into the interior of the compressor housing, and wherein the outer tube opens via a compensating opening and communicates with the interior of the compressor housing, and

wherein the compensating volume and filling volume are arranged so that refrigerant from the suction pipe flows into the compensating volume by passing through the filling volume.

Allowable Subject Matter

4. Claims 9-16 are allowed.
5. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose a suction muffler through which the refrigerant flows to the suction valve of a piston-cylinder unit, said suction muffler being disposed on a cylinder head of the piston-cylinder unit and comprising: a filling volume; an inlet cross section through which refrigerant flows into the suction muffler; and a compensating volume in connection with the suction muffler and the interior of the compressor housing and in which the refrigerant oscillates, wherein the inlet cross section is simultaneously a connecting port between the compensating volume and the filling volume, and the compensating volume is formed by an outer tube which tightly encloses the intake port

Art Unit: 3746

and the inlet cross section and encloses a refrigerant suction pipe at least along a section, wherein the suction pipe extends from the exterior of the compressor housing into the interior of the compressor housing, and wherein the outer tube opens via a compensating opening and communicates with the interior of the compressor housing.

6. It is noted by the examiner, and stated here for the record of prosecution, that the aspect of the instant invention determined to be novel and patentably distinct from the prior art is the suction pipe extending from the exterior of the compressor housing into the interior of the compressor housing, and the outer tube opening via a compensating opening and communicating with the interior of the compressor housing. This limitation, in combination with the inlet cross section being simultaneously a connecting port between the compensating volume and the filling volume and the compensating volume being formed by an outer tube which tightly encloses the intake port and the inlet cross section and encloses a refrigerant suction pipe at least along a section makes the claim read over the prior art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PETER J. BERTHEAUD whose telephone number is (571)272-3476. The examiner can normally be reached on M-F 9am - 5pm.

Art Unit: 3746
